Mayangone

➤ EDUCATION

DAGON UNIVERSITY(DISTANCE EDUCATION)

YEAR 2018 - YEAR 2022

Specialized in English Major

Ex;brain Web development Course

(8 months program where I learn both frontend and backend)

CERTIFICATIONS

JAVA(SE) (Ex;brain)

➤ EXPERTISE

- HTML, Tailwind CSS, Javascript
- VueJS , Inertia , Laravel, MySql
- NodeJS, Express JS, MongoDB
- GitHub
- Digital Ocean(Droplets, Spaces,
- Databases)

➤ WHAT I FOCUS ON

Currently pursuing web development studies at Exbrain, I am driven to carve a career path within the expansive IT landscape. My educational foundation fuels a passion for embracing fresh experiences and tackling new challenges. I am eagerly seeking career opportunities that foster continuous learning and expose me to innovative technologies.

I thrive in dynamic environments and am adept at performing under pressure. I am confident that my skills and experiences will enable me to make meaningful contributions wherever I go.

WORKING EXPERIENCES

Ex;brain Technology

2 month OJT (2023 October - 2023 December)

- Enhanced and debugged company projects, introducing new features for improved functionality
- Successfully deployed projects to servers, ensuring seamless integration and optimal performance

PROJECT EXPERIENCES

PROJECT TITLE: E-COMMERCE

Objective: to maximize online sales by providing a seamless, personalized shopping experience while expanding market reach and optimizing operational efficiency.

Description:

- Designed UI/UX for optimal user experience
- Implemented both frontend and backend components
- Develop both frontend and backend for customer scope

Admin Scope: Data Analysis and Survey

- Conducted comprehensive data analysis to enhance backend functionalities, optimizing inventory management and sales tracking.
- Designed and implemented surveys tailored for admin functionalities, facilitating decision-making processes and strategic improvements.

Merchant Scope: Inventory Management and Product Details

- Developed and integrated inventory management systems, enabling merchants to efficiently monitor stock levels and product details.
- Implemented stock list and stock update features, empowering merchants to manage inventory effectively for optimal sales performance.

User Scope: E-commerce Features and Support

- Engineered a user-friendly login, register, and forget password system, ensuring a seamless and secure user experience.
- Created a dynamic dashboard, providing users with an intuitive interface to access order details, invoices, and personalized settings.
- Facilitated secure payment gateways and contact channels, prioritizing user satisfaction and support in their e-commerce journey.
- Ensured smooth navigation and functionality for users with features like product details and an easy logout process.

User Interface Development:

- Engineered a user-centric profile menu, profile edit, and address pages, enhancing user engagement and experience.
- Designed and developed a dynamic dashboard, providing users with a comprehensive overview of their activities and orders.

Product Management:

- Implemented functionalities enabling easy addition of products and categories, enhancing the platform's flexibility and scalability.
- Enhanced product details and product list pages for intuitive navigation and informative product presentation.

User Authentication and Account Management:

- Developed secure and user-friendly login, register, and forget password features, ensuring a seamless user journey.
- Implemented robust update profile and customer profile functionalities for personalized user experiences.

Order Management and Transactions:

- Engineered order details and order history pages, empowering users to track their purchases and manage transactions efficiently.
- Created a comprehensive system to manage orders, transactions, and delivery processes, ensuring seamless transactions and reliable delivery.

Customer Relationship Management:

- Implemented customer list and customer profile features, enabling efficient customer management and personalized interactions.

Deployment and Hosting:

- Successfully deployed the e-commerce platform onto Digital Ocean servers, ensuring high availability and reliability.
